

PROJECT

# Foundations for Telecommunication Towers

LOCATION

Uruguay

INFORMATION

Area: Industrial infrastructures  
Market: Foundations for telecommunication towers  
Year of completion: 2013  
Contractor: Ebital  
Final client: Administración Nacional de Telecomunicaciones de Uruguay (Antel)  
Our work: Preliminary design and detailed design

DESCRIPTION

RDA Engineering collaborated with Ebital in a contract with Antel company, for the construction of 65 telecommunication antennas.

SOLUTION

The project consists in the design of several reinforced concrete foundations, for three antenna types: monopoles, cable-stayed poles and self-supported towers.
