

PROJECT

Cement production plant

LOCATION

Montevideo, Uruguay

INFORMATION

Area: Civil structures
Market: Industrial structures
Year of completion: 2018
Contractor: Cimsa
Final client: Cimsa
Our work: Detailed design

DESCRIPTION

CIMSA is a Uruguayan company specialized in the production of portland cement. Given the features of the equipment used on their new production plant, there was a need for some unique structures that would be subjected to significant dynamic stress.

SOLUTION

We developed the detailed design of the necessary structures of the production plant, including steel warehouses used for storage purposes, a mill and a palletizer, a shed for the clinker and two cement silos.
