

PROJECT

# Ex Anglo Meatpacking Plant Dock

LOCATION

Río Negro, Uruguay

INFORMATION

Area: Civil works  
Market: Ports  
Year of completion: 2019  
Contractor: Dyma Ingeniería  
Final client: Administración Nacional de Puertos de Uruguay (ANP)  
Our work: Detailed design

DESCRIPTION

The aim of the project was the reconstruction of the walkway which connects the original quay to the ground (made in 1863) and the construction of a new dock for sport boats.

SOLUTION

The entrance walkway, which is 115 ft. long, is built with a wooden lattice design, and connections were made with steel bolts and grafts. Given that the structure belongs to the former Anglo meatpacking plant these were declared a World Heritage Site by UNESCO, the projected structure had to meet similar esthetic and conception standards to the original structure. A 165 feet steel pier was projected, meeting the necessary requirements for docking and mooring.
