

PROJECT

Fortaleza Molas Lopez

LOCATION

Asunción,
Paraguay

INFORMATION

Area: Building structures
Market: Residential building
Year of completion: 2022
Developer: Fiscra
Architecture: JG – Julia Galanti Arquitecta
Our work: Detailed design

DESCRIPTION

The building consists of 10 split levels for parking, all of them elevated from the ground floor, 21 stories of residences and one rooftop level designed for amenities. This totals approximately 277,000 sq ft. and reaches a height of around 330 ft.

SOLUTION

The building was projected using a core of reinforced concrete and ribbed slabs, which allowed for reductions in execution time and volume of concrete.
