

PROJECT

Planning and urban development for Barrio Sur

LOCATION

Artigas, Uruguay

INFORMATION

Area: Road infrastructures
 Market: Planning and urban development
 Year of completion: 2016
 Contractor: Constructora Oriental
 Final client: Intendencia de Artigas (Uruguay)
 Our work: Tender project and detailed design

DESCRIPTION

Barrio Sur, a neighborhood located in Artigas (Uruguay), had a significant population growth that made it necessary for new infrastructure to be developed. The Municipality government of Artigas was looking for a comprehensive solution that could benefit approximately 1,400 people, including residents of the neighborhood and nearby areas.

SOLUTION

We carried out the planning and design of pavement for streets, sidewalks, gutter curbs, rain drainage, and public lighting. Previous work was done to obtain the necessary information to carry out the project, including site inspections, altimetry studies, hydraulic studies, and environmental management studies.

OUR QUALITY TURN

The project's success strongly depended on understanding local community needs. For this reason we strived to achieve the best solution in collaboration with both public and private entities.
