

PROJECT

Transmision Station

LOCATION

Nueva Palmira, Uruguay

INFORMATION

Area: Industrial infrastructures
Market: Infrastructures for energy
Year of completion: 2019
Contractor: Montelecnor
Final client: Administración Nacional de Usinas y Transmisiones Eléctricas de Uruguay (UTE)
Our work: Detailed design

DESCRIPTION

In the context of a Public Procurement Procedure called by UTE for works at the Nueva Palmira Transmision Station, Montelecnor asked RDA Engineering for cooperation for the civil works, including the executive project of structures, roads, storm drainage and masonry. Furthermore, the technical assistance at the construction site was provided.

SOLUTION

The foundations for equipment, arcades, light posts, water-oil separating pit, spacer tanks for transformers, wire canals, expansion of the building and auxiliary steel structures were all calculated.
